Recommendation

I would like to recommend Dmitry Byurganovsky as an orchestrator and arranger.

I have known Dmitry since 2020, when he began to cooperate with our theater "Buff".

During this time, he demonstrated his professional qualities and showed himself to be a true expert. Throughout his work, he exhibited unwavering professionalism and exceptional technical skill.

Dmitry has a deep knowledge of the principles of orchestration, which he applies flawlessly in his work. He also knows how to work with a virtual orchestra, which is a very important skill in today's music industry. In cases when we needed to achieve the effect of a "live" orchestra in our productions, we always turned to Dmitry, knowing that we would get a worthy result.

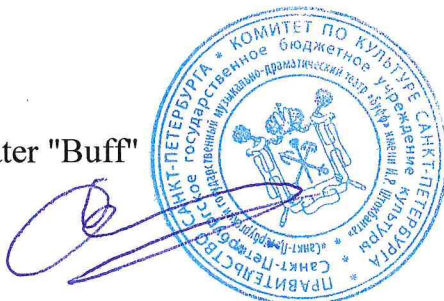

In addition, Dmitry skillfully mixes musical material, ensuring the perfect sound of each instrument in the composition. He also has a unique technical background, which helps him to create professional arrangements and orchestrations using modern technologies.

Dmitry is always diligent and sociable, he has an excellent ability to work quickly and efficiently, which allowed him to complete his work on time and without delay. He has also shown his ability to build good relationships with colleagues, which is very important in our profession.

The performances in which Dmitry participated were held with great success, which confirms his professionalism and ability to create a high-quality musical atmosphere.

I am sure that Dmitry is a talented and responsible specialist who can be useful to any team. I recommend him as an orchestrator and arranger and I am sure that he will decorate the productions of any musical theater with his creativity.

Sincerely,
Artistic director of the theater "Buff"

Mikhail Smirnov
